

Performance Assessment Workshop.

An external and independent review of your production process.

Optimize your production processes.

Trust in the market leader's experience.

Together we can exploit your full production potential. We identify possible issues and untapped resources. Issues will be analyzed to find their root cause and to define and evaluate further actions.

Scope of delivery

On-site assessment by an interdisciplinary expert team

A detailed product and process analysis combined with a machine and safety inspection.

Evaluation of findings

Risk analysis of the impact on important production factors such as availability, efficiency and safety.

Detailed report and action proposals

Comprehensive documentation including all findings, their impacts and recommended actions for improvements.

Your benefits

External, independent review

An in-depth analysis of your production processes from our experts, including a detailed statement about costs for possible improvements.

Know your potential

Discovering hidden opportunities for production streamlining, cost savings and a safer work environment.

Action plan customized to your needs

Development of a detailed action plan to help you decide how to optimize your production process.
